## How much does it cost (USD)?

### If you were to invest 10,000 for 5 years, with an expected market return of 5% per year:

Fees presented are indicative and for illustrative purposes. Theoretically if no fees were charged, your investment would be worth **12,763.87**. After fees your investment would be worth **11,280.89**. Which is a reduction of **1,481.92**. Or a reduction from the initial **5%** per year market return to an actual **2.4%** per year return.

## Strategy

The investment objective of the Fund is to seek long-term capital appreciation. The Fund will actively seek to achieve its objective by primarily investing in equity and equity-related securities of Indian companies. The Investment Manager takes sustainability risks into account when making investment decisions in respect of the Fund. The Fund will invest at least two thirds of its net assets in equity and equity related transferable securities listed or traded on a Recognised Market and/or other collective investment schemes which provide exposure to companies that are domiciled in, or which derive a predominant proportion of their revenues or profits from India. Equity related transferable securities include common stock, preferred stock and warrants.
