**Morningstar's Analysis**[Our Take](#)[Comparables](#)[Archive](#)

The combination of a middling Process Pillar rating and a Below Average People Pillar rating limit Multipartner Tata India Equity D USD Acc to a Morningstar Medalist Rating of Negative.

**Morningstar Manager  
Research**  
Morningstar

**Summary Negative**

Fees are a weakness here. The strategy's lofty fees are a high hurdle to clear, as it is priced within the second-costliest quintile among peers.

The team managing the strategy earns a Below Average People Pillar. The fund's assessment garners an Average Process Pillar rating. To be considered a quality steward, this strategy's parent organization needs to improve factors like relatively short tenured portfolio managers and an unfavorable turnover ratio.

# Price

## How much does it cost (USD)?

If you were to invest 10,000 for 5 years, with an expected market return of 5% per year:

Fees presented are indicative and for illustrative purposes. Theoretically if no fees were charged, your investment would be worth **12,764.81**. After fees your investment would be worth **10,927.16**. Which is a reduction of **1,835.66**. Or a reduction from the initial **5%** per year market return to an actual **1.8%** per year return.
